Software-focused Vocational High School student with 2+ years of experience delivering 6+ cross-platform mobile, web, and backend projects, including a school-wide certification system and a multi-language REST API. Proficient in GetX, REST API integration, SQLite, responsive web development, and Node.js backend development. Hafiz Al-Qur'an (30 Juz). Seeking a Junior Flutter Developer, Web Developer, or Backend Developer internship or remote opportunity.

SKILLS

Languages & Frameworks: Flutter (Intermediate), Dart, Node.js (Basic), HTML & CSS, Laravel (Basic), PHP (Basic), React(Beginner/Junior)

Soft Skills: Team Collaboration, Communication, Problem Solving, Time Management, Adaptability

Tools & State Management: GetX, REST API Integration, Git & GitHub, Responsive Design, Vercel, BLoC, Laragon, Herd, Pubspec

Database: SQLite (Intermediate), MySQL

PROJECTS

ArbainAPI [↗](#)

Jun 2026 - Jun 2026

As Backend Developer

- Built a RESTful API serving the complete Hadith Arbain An-Nawawi collection in 3 languages (Arabic, English, Indonesian), structured with modular Express Router for clean separation of concerns
- Implemented 3 core endpoints (get all, get by ID, random hadith) with proper HTTP status codes and JSON response formatting
- Secured the API with Helmet, CORS, and rate limiting (100 req/15 min per IP), following REST API security best practices
- Organized project architecture with a dedicated data layer and route handlers, improving maintainability and scalability

Tech Stack: Node.js, Express.js, Helmet, CORS, express-rate-limit

Noor Travel [↗](#)

May 2026 - Jun 2026

As Frontend Developer

- Built a responsive Umrah travel service web application using **React, Vite, and Tailwind CSS v4**, reducing initial load time by ~40% compared to CRA-based setup
- Implemented **dynamic routing** with React Router DOM, enabling a single reusable template to serve 3+ package detail pages and eliminating ~60% redundant code
- Structured application data using a **centralized data layer** following SOLID principles, reducing data update effort from N files to a single source of truth
- Developed **8+ reusable UI components** (hero, feature cards, package cards, multi-section layouts) accelerating future feature development

Tech Stack: React, Vite, Tailwind CSS v4, React Router DOM, React Icons

LSP MKC App — Academic Project (Ujikom) [↗](#)

Jan 2026 - May 2026

As Flutter Frontend Developer

- Developed a mobile application for the **Professional Certification Body (LSP MKC)** to manage vocational competency certifications, deployed school-wide to streamline tracking for over **lot assessment candidates**.

Tech Stack: Flutter, GetX, Laravel REST API

Alera App | 3rd Semester Academic Final Project [↗](#)

Nov 2025 - Nov 2025

As Frontend Flutter Developer

- Designed and implemented the full frontend architecture of a solution-oriented mobile application
- Integrated external API services and delivered the complete project as part of a 3-person development team within a tight academic deadline

Tech Stack: Flutter, REST API

News App — Personal Project [↗](#)

Oct 2025 - Oct 2025

- Built a real-time news application from scratch, integrating Newsapi.org **to fetch and render global news updates from the endpoints instantly**.
- Managed the complete end-to-end development cycle independently, **delivering a production-ready application from design to deployment within a 2-week timeframe**.

Tech Stack: Flutter, Dart, Newsapi.org REST API

E-Commerce App --- Personal Project [↗](#)

Oct 2025 - Oct 2025

As Frontend Flutter Developer

- Developed a fully functional e-commerce mobile app featuring product catalogs, shopping cart, and checkout workflows, structuring over

5+ core interactive screens with clean state management. Implemented complete mobile shopping experiences using Flutter by integrating 2+ RESTful API endpoints to fetch dynamic product data and process checkout requests efficiently.	
Tech Stack: Flutter, Dart, REST API Payroll Service ↗ As Fullstack Developer	Apr 2025 - May 2025
Developed a web-based payroll management system independently within 1 month, covering the full employee salary lifecycle from attendance tracking to payslip generation. - Built 5 core modules: attendance management, salary calculation, payroll processing, salary monitoring, and PDF payslip export - Delivered a production-ready Laravel MVC application with complete backend logic, database design, and frontend views - Implemented automated PDF generation for payslips, eliminating manual salary documentation	
Tech Stack: Laravel, PHP, MySQL, Bootstrap E-Library ↗ As Fullstack Developer	Apr 2025 - May 2025
Developed a web-based digital library system independently within 1 month, supporting multiple user roles with distinct access levels. - Built 4 core modules: book catalog management, book borrowing system, book purchasing, and admin CRUD operations - Implemented multi-user architecture with role-based access control for admins and regular users - Delivered complete full-stack application following Laravel MVC conventions with database migrations and structured routing	
Tech Stack: Laravel, PHP, MySQL, Bootstrap E-Report ↗ As Fullstack Developer	Nov 2024 - Dec 2024
Built a community reporting web platform independently within 1 month using native PHP, enabling citizens to submit and engage with public reports. - Developed 5 core features: user authentication, profile management, public report submission, and social interaction via likes and comments - Implemented full user lifecycle from registration to login/logout with session-based authentication - Delivered complete frontend and backend without frameworks, demonstrating strong foundational PHP skills	
Tech Stack: PHP, MySQL, HTML & CSS
